Assessment & RMF compliance capacity

Evidence-driven support from boundary to authorization

RMF lifecycle support

Prepare, Categorize, Select, Implement, Assess, Authorize, and Monitor.

Security control assessments

Interview, examine, and test procedures; evidence review; findings validation; risk rating.

Assessment readiness reviews

SSP, SAP, SAR, POA&M, risk register, control inheritance, policies, procedures, and artifacts.

Vulnerability & configuration assessments

Network, endpoint, server, application, cloud, STIG-style hardening, and baseline review.

Risk remediation & POA&M closure

Prioritized gaps, owners, target dates, corrective actions, closure evidence, and risk-response support.

Continuous monitoring

Metrics, dashboards, reauthorization support, audit trails, and decision-ready risk reporting.

Common assessment outputs

System inventory, boundary rationale, evidence matrix, findings log, SAR inputs, POA&M updates, and closure package.

Core capabilities

Four service lines

Cybersecurity & Risk Management

Vulnerability assessments, penetration test support, threat monitoring, endpoint security, and cyber awareness.

Healthcare System Support

Government risk and compliance initiatives, health information systems, regulatory support, and clinical workflow optimization.

IT & Systems Engineering

Systems integration, cloud migration support, secure infrastructure baselines, data workflows, and technical operations.

Program Management

A&A scheduling, stakeholder coordination, QA reviews, risk reporting, milestone tracking, and executive summaries.

Systems we assess & support

- Federal and DoD information systems
- Healthcare and health information systems
- Cloud, SaaS, IaaS, PaaS, and hybrid environments
- On-prem networks, enclaves, and enterprise services
- Business applications, APIs, databases, and data platforms
- Endpoints, servers, identity/IAM, and access platforms
- New systems, inherited systems, major changes, and reauthorization packages

Differentiators

- Veteran-led SDVOSB with small-business agility and mission focus.
- 25+ years of government and private-sector experience through the Government Services Group.
- Assessor mindset: boundaries, artifacts, findings, POA&M traceability, and clear evidence.
- Prime/subcontract teaming support for agencies, integrators, and GovCon partners.
- Decision-ready reporting for system owners, ISSOs/ISSMs, engineers, assessors, and leadership.
